

Africa - location and Physical Features

I Key concepts.

- 1) Location and extent of Africa
- 2) Plateau continent
- 3) Rift valley
- 4) Mountains of Africa
- 5) Major rivers and lakes of Africa
- 6) Deserts and plateau of Africa

II Concept Map

Desert

Sahara

Kalahari

Namib

Rivers

Nile

Congo

Zambezi

Niger

Lakes

Victoria

Chad

Nasser

Kariba

Q. Give reasons for the following:

Q1. The Sahara desert is very hot and dry.

Ans. The Sahara desert receives very little rainfall throughout the year. Hot winds and clear skies increase day time temperatures, so Sahara deserts remains very hot and dry.

Q2. Africa called a plateaus continent.

Ans. Much of Africa is made up of old plateaus.

these plateaus rise steeply from narrow coastal plains.

Q3 River Nile flows through Sahara desert, yet carries water throughout the year why?

Ans. River Nile originates from equatorial region which receives rainfall throughout the year.

• River Nile fed by large lakes like Victoria which provides continuous water supply.

• The blue Nile and the white Nile which flows steadily adds water during rainy season to the river Nile.

Hence, it flows all year even though it passes through Sahara desert it never dries.

Q. Answer the following

Q1. Explain any 3 ~~features~~ physical features of Africa

- Ans.
- 1) Africa has large deserts - Sahara, Kalahari
 - 2) Africa has high plateaus in east & south
 - 3) Africa has major rivers like Nile, Congo, Zambesi, Niger passes through the continent.

Homework

Q. main

1) What is the latitudinal and longitudinal extent of Africa.

Ans. Africa lies between 37°N latitude in the north 35°S latitude in the south, and between 17°W longitude in the west and 51°E

2. Where are the Atlas and the Drakensberg mountains located? What is similarity between them?

Ans. The Atlas mountains are located in the North western part of Africa. These are young fold mountains. They comprise three parallel ranges. The Drakensberg mountains are located along the South eastern coast. These are mountains and form the steep eastern edge of a vast plateau. The location and the type of mountain they are.

3. What do you know about the extent of great rift valley.

Ans. The great Rift valley is located in the east. It extends from Lake Malawi in the South to the Red sea in the north and through the Gulf of Suez and Gulf of Aqaba to the dead sea in Asia.
